

Certified Lead Privacy Implementer Course

Course Duration: 40 Hrs.

Course Code: CLPI-001

Course Overview

The Certified Lead Privacy Implementer Course provides comprehensive training on implementing privacy management frameworks in line with international standards such as ISO/IEC 27701 and GDPR. This course equips participants with the knowledge and skills to establish, implement, and maintain privacy policies, manage personal data responsibly, and ensure organizational compliance with privacy regulations.

What you'll learn?

Participants will learn how to develop and implement privacy management systems, conduct privacy risk assessments, and integrate privacy controls into organizational processes. The course also covers data protection principles, compliance requirements, monitoring, and continuous improvement practices for effective privacy management.

Target Audience

This course is suitable for data protection officers, privacy managers, compliance officers, IT security professionals, and legal advisors responsible for managing personal data and ensuring organizational privacy compliance. It is also ideal for consultants supporting privacy initiatives in organizations.

Pre-Requisites

There are no mandatory prerequisites, but a basic understanding of data protection laws, privacy regulations, and information security principles is recommended to fully benefit from the course content.
