

ISO 14001 Foundation Course

Course Duration: 16 Hrs.

Course Code: ISO14001-FND

Course Overview

The ISO 14001 Foundation Course provides participants with a fundamental understanding of the ISO 14001 standard for Environmental Management Systems (EMS). The course is designed to introduce learners to the principles, structure, and benefits of implementing an EMS to manage environmental responsibilities, ensure regulatory compliance, and enhance sustainability practices.

What you'll learn?

Participants will learn the core concepts and requirements of ISO 14001, including environmental policy development, planning, implementation, monitoring, and continual improvement. The course also covers the importance of risk-based thinking, legal compliance, and how an EMS can drive sustainable practices within an organization.

Target Audience

This course is ideal for environmental managers, quality managers, operational staff, consultants, and professionals responsible for environmental management or seeking foundational knowledge of ISO 14001. It is also suitable for individuals preparing for further ISO 14001 training or implementation.

Pre-Requisites

There are no formal prerequisites for this course. However, a basic understanding of environmental issues, organizational processes, or management systems will help participants better understand the course content.
