

ISO 18788 Foundation Course

Course Duration: 16 Hrs.

Course Code: ISO18788-FND

Course Overview

The ISO 18788 Foundation Course provides participants with an understanding of the principles and requirements of the ISO 18788 standard for establishing, implementing, and managing a Security Operations Management System (SOMS). The course is designed to help organizations ensure effective, accountable, and compliant security operations while managing risks and protecting stakeholders.

What you'll learn?

Participants will learn the key concepts and structure of ISO 18788, including risk management, governance, operational controls, and performance evaluation. The course covers how to implement best practices in security operations, ensure compliance with international standards, and enhance organizational accountability and effectiveness.

Target Audience

This course is ideal for security managers, risk managers, compliance officers, consultants, and professionals responsible for managing or auditing security operations. It is also suitable for individuals seeking foundational knowledge of ISO 18788 for career advancement or organizational improvement.

Pre-Requisites

There are no formal prerequisites for this course. However, prior knowledge of security management, risk management, or organizational processes will be beneficial for participants.
