

ISO 18788 Introduction Course

Course Duration: 8 Hrs.

Course Code: ISO18788-INT

Course Overview

The ISO 18788 Introduction Course provides participants with a basic understanding of the ISO 18788 standard for Security Operations Management Systems (SOMS). The course is designed to familiarize learners with the principles, structure, and benefits of implementing a standardized approach to managing security operations, ensuring accountability, compliance, and risk management.

What you'll learn?

Participants will learn the fundamental concepts of ISO 18788, including governance, risk management, operational controls, and performance monitoring. The course also covers the benefits of applying ISO 18788 to enhance security operations, improve compliance, and achieve organizational objectives.

Target Audience

This course is suitable for security managers, operational staff, compliance officers, consultants, and professionals involved in security operations or seeking foundational knowledge of ISO 18788. It is also ideal for individuals preparing for further ISO 18788 training or implementation.

Pre-Requisites

There are no formal prerequisites for this course, though basic awareness of security management principles or organizational operations will help participants better understand the material.
