

ISO 21001 Lead Implementer Course

Course Duration: 32 Hrs.

Course Code: ISO21001-LI

Course Overview

The ISO 21001 Lead Implementer Course provides participants with the expertise to establish, implement, manage, and maintain an Educational Organizations Management System (EOMS) based on the ISO 21001 standard. The course focuses on enhancing educational processes, improving learner satisfaction, and ensuring alignment with international best practices in education management.

What you'll learn?

Participants will learn how to interpret the requirements of ISO 21001, develop policies and objectives for an EOMS, and integrate them into the organization's educational processes. The course also covers risk management, performance evaluation, and continual improvement practices to strengthen the efficiency and effectiveness of educational organizations.

Target Audience

This course is designed for education managers, administrators, consultants, trainers, and professionals involved in implementing or managing educational management systems. It is also suitable for individuals seeking to support educational organizations in achieving compliance with ISO 21001.

Pre-Requisites

There are no formal prerequisites, but participants will benefit from a basic understanding of education management principles, quality management systems, or ISO standards to fully grasp the course content.
