

ISO 21500 Introduction Course

Course Duration: 8 Hrs.

Course Code: ISO21500-INT

Course Overview

The ISO 21500 Introduction Course provides a fundamental understanding of project management concepts and principles based on the ISO 21500 standard. This course is designed to help participants familiarize themselves with the guidelines for effective project management, including planning, execution, control, and completion of projects in alignment with international best practices.

What you'll learn?

Participants will learn the key concepts, terminology, and processes of ISO 21500, including how to apply project management principles in different organizational contexts. The course covers project management practices, stakeholder engagement, performance evaluation, and the integration of ISO 21500 guidelines into organizational project frameworks.

Target Audience

This course is ideal for project managers, team leaders, coordinators, consultants, and professionals involved in managing or supporting projects. It is also suitable for individuals seeking to gain a foundational knowledge of ISO 21500 and its application in project management.

Pre-Requisites

There are no formal prerequisites for this course. However, a basic understanding of project management principles and organizational processes will be helpful for participants.
