

ISO 21502 Foundation Course

Course Duration: 16 Hrs.

Course Code: ISO21502-FND

Course Overview

The ISO 21502 Foundation Course introduces participants to the fundamental principles and practices of project management as defined by the ISO 21502 standard. This course provides essential knowledge on managing projects effectively, covering aspects such as planning, execution, monitoring, and closing, with a focus on aligning projects with organizational objectives and international best practices.

What you'll learn?

Participants will gain an understanding of the ISO 21502 framework, its terminology, and its application in real-world project environments. The course covers project lifecycle stages, roles and responsibilities, governance structures, performance monitoring, and the integration of project management practices into organizational systems.

Target Audience

This course is ideal for project managers, coordinators, team members, consultants, and professionals involved in managing or supporting projects. It is also suitable for individuals seeking foundational knowledge of ISO 21502 and its role in enhancing project management practices.

Pre-Requisites

There are no formal prerequisites for this course. However, a basic understanding of project management concepts and organizational practices will be beneficial for participants.
