

ISO 22000:2018 Transition Course

Course Duration: 16 Hrs.

Course Code: ISO22000-TRN

Course Overview

The ISO 22000:2018 Transition Course is designed to help participants understand the key updates and changes introduced in the 2018 version of the ISO 22000 standard for Food Safety Management Systems (FSMS). This course enables professionals to smoothly transition from the previous version to the updated standard, ensuring compliance with the latest requirements and aligning food safety practices with international best practices.

What you'll learn?

Participants will learn about the structural changes in ISO 22000:2018, the integration of the High-Level Structure (HLS), and the new risk-based thinking approach. The course covers updates on leadership, planning, operational controls, and performance evaluation requirements, along with practical guidance for implementing these changes within existing food safety systems.

Target Audience

This course is suitable for food safety managers, quality assurance professionals, auditors, consultants, and anyone involved in maintaining or implementing ISO 22000 within their organizations. It is also valuable for individuals preparing to update their certification to the ISO 22000:2018 standard.

Pre-Requisites

Participants should have prior knowledge of ISO 22000:2005 or experience in food safety management systems. Familiarity with auditing practices and ISO management system frameworks will be an added advantage.

Course Content

Module 1: Overview of ISO 22000 and Transition to the 2018 Version
