

ISO 22301 Introduction Course

Course Duration: 8 Hrs.

Course Code: ISO22301-INT

Course Overview

The ISO 22301 Introduction Course provides participants with a foundational understanding of Business Continuity Management Systems (BCMS) based on the ISO 22301 standard. The course is designed to help learners recognize the importance of business continuity, understand key concepts, and gain insight into how organizations can prepare for, respond to, and recover from disruptive incidents.

What you'll learn?

Participants will learn the fundamental principles of ISO 22301, including risk assessment, business impact analysis, continuity planning, and performance evaluation. The course also covers the benefits of implementing a BCMS to enhance organizational resilience, ensure compliance, and protect critical business functions.

Target Audience

This course is suitable for business continuity managers, risk managers, auditors, consultants, and professionals involved in planning, managing, or supporting business continuity initiatives. It is also ideal for individuals seeking foundational knowledge of ISO 22301 before pursuing advanced training.

Pre-Requisites

There are no formal prerequisites for this course. However, a basic understanding of risk management, organizational processes, or management systems will help participants grasp the course content more effectively.
