

ISO 22301 Lead Implementer Course

Course Duration: 40 Hrs.

Course Code: ISO22301-LI

Course Overview

The ISO 22301 Lead Implementer Course is designed to provide participants with the skills and knowledge required to establish, implement, manage, and maintain a Business Continuity Management System (BCMS) in accordance with ISO 22301. The course focuses on ensuring organizational resilience by preparing for, responding to, and recovering from disruptive incidents while meeting compliance requirements and best practices.

What you'll learn?

Participants will learn how to interpret ISO 22301 requirements, develop business continuity policies and objectives, conduct risk assessments, perform business impact analyses, and implement effective continuity plans. The course also covers monitoring, measurement, and continual improvement processes to enhance BCMS performance.

Target Audience

This course is suitable for business continuity managers, risk managers, compliance officers, consultants, auditors, and professionals responsible for implementing or managing a BCMS. It is also ideal for individuals seeking to support organizations in achieving ISO 22301 certification.

Pre-Requisites

Participants should have a basic understanding of business continuity, risk management, or management system principles. Prior knowledge of ISO

22301 or experience in business continuity management will be beneficial but is not mandatory.
