

ISO 27001 Introduction Course

Course Duration: 8 Hrs.

Course Code: ISO27001-INT

Course Overview

The ISO 27001 Introduction Course provides participants with a basic understanding of Information Security Management Systems (ISMS) and the key requirements of ISO 27001:2022. It introduces the concepts, principles, and benefits of implementing an ISMS, helping organizations protect sensitive information, manage risks, and build trust with stakeholders. This course serves as a starting point for individuals and organizations looking to familiarize themselves with the fundamentals of ISO 27001.

What you'll learn?

In this course, you will learn the purpose and structure of ISO 27001, the core principles of information security, and the benefits of implementing an ISMS. You will gain insights into risk management, security controls, compliance requirements, and how ISO 27001 helps organizations achieve resilience against information security threats.

Target Audience

This course is ideal for beginners, students, professionals, and individuals seeking an introduction to ISO 27001 and information security concepts. It is also suitable for employees of organizations planning to implement ISO 27001 who need a high-level overview of the standard.

Pre-Requisites

There are no formal prerequisites for this course. However, a basic awareness of information technology, data protection, or risk management can be useful to better understand the concepts.
