

ISO 27701 Foundation Course

Course Duration: 16 Hrs.

Course Code: ISO27701-FND

Course Overview

The ISO 27701 Foundation Course provides participants with a comprehensive introduction to privacy information management based on ISO/IEC 27701. It covers the principles, framework, and requirements for establishing, implementing, and maintaining a Privacy Information Management System (PIMS) in alignment with ISO 27001. The course is designed to help professionals understand how organizations can manage personal data securely, comply with privacy regulations, and enhance trust with stakeholders.

What you'll learn?

In this course, you will learn the fundamentals of privacy information management, including the integration of ISO 27701 with an existing ISMS, the roles and responsibilities for managing personal data, and the implementation of controls to protect privacy. You will gain insights into regulatory requirements, risk management for privacy, and methods to ensure compliance and continuous improvement.

Target Audience

This course is suitable for privacy officers, information security managers, compliance officers, IT professionals, and anyone involved in managing or protecting personal data within an organization. It is also ideal for individuals seeking foundational knowledge of ISO/IEC 27701 and privacy management practices.

Pre-Requisites

There are no formal prerequisites for this course. A basic understanding of information security concepts or ISO 27001 will be beneficial but is not required.
