

ISO 27701 Introduction Course

Course Duration: 8 Hrs.

Course Code: ISO27701-INT

Course Overview

The ISO 27701 Introduction Course provides participants with a basic understanding of privacy information management in accordance with ISO/IEC 27701. It introduces the concepts, framework, and benefits of establishing a Privacy Information Management System (PIMS) to protect personal data and comply with privacy regulations. This course is ideal for beginners who want to understand the fundamentals of privacy management and how it integrates with an Information Security Management System (ISMS).

What you'll learn?

In this course, you will learn the key principles and objectives of ISO/IEC 27701, including the management of personal data, privacy controls, and risk-based approaches to information security. You will gain insights into the structure of a PIMS, the responsibilities of privacy officers, and the benefits of implementing privacy management practices for organizational compliance and stakeholder trust.

Target Audience

This course is suitable for individuals new to privacy management, IT professionals, information security staff, compliance officers, and anyone seeking an introductory understanding of ISO/IEC 27701 and privacy information management practices.

Pre-Requisites

There are no formal prerequisites for this course. A basic awareness of information security or organizational processes will be helpful for understanding the concepts.
