

ISO/TS 22317 Introduction Course

Course Duration: 8 Hrs.

Course Code: ISO22317-INT

Course Overview

The ISO/TS 22317 Introduction Course provides a foundational understanding of Business Impact Analysis (BIA) as outlined in ISO/TS 22317. It introduces participants to the purpose, scope, and benefits of BIA, explaining how it supports effective business continuity management. This course helps learners understand the methodology, key concepts, and importance of conducting a BIA to ensure organizational resilience.

What you'll learn?

In this course, you will learn the fundamental principles of Business Impact Analysis, the role it plays within business continuity management, and the steps required to implement it effectively. You will gain insights into identifying critical activities, assessing potential impacts of disruption, and aligning BIA outcomes with business continuity objectives.

Target Audience

This course is designed for individuals who are new to business continuity and BIA, including business continuity professionals, risk managers, compliance officers, and managers seeking to understand the fundamentals of BIA. It is also suitable for anyone interested in strengthening their knowledge of organizational resilience.

Pre-Requisites

There are no formal prerequisites for this course. However, a basic understanding of business continuity concepts or organizational risk management can be helpful for fully grasp the course material.
