

ISO/IEC 27002 Foundation Course

Course Duration: 16 Hrs.

Course Code: ISO27002-FC

Course Overview

The ISO/IEC 27002 Foundation Course provides a comprehensive introduction to the guidelines and best practices for implementing information security controls as outlined in ISO/IEC 27002. It helps participants understand the structure, objectives, and implementation of security measures to support an effective Information Security Management System (ISMS).

What you'll learn?

In this course, you will learn the fundamental principles of ISO/IEC 27002, including security control categories, risk management alignment, and how to implement and manage controls to protect information assets. You will also gain knowledge of practical measures for confidentiality, integrity, and availability of information.

Target Audience

This course is intended for individuals who want to gain foundational knowledge of information security controls. It is ideal for IT professionals, information security practitioners, compliance officers, risk managers, and anyone involved in the development or implementation of ISMS.

Pre-Requisites

No formal prerequisites are required for this course. However, a general understanding of information security concepts will be beneficial.

Course Content

Module 1: Introduction to ISO/IEC 27002 and its relationship with ISO/IEC 27001

Module 2: Information security principles and objectives

Module 3: Categories of information security controls

Module 4: Implementation guidance for organizational, people, physical, and technological controls

Module 5: Risk management and alignment with ISO/IEC 27002

Module 6: Monitoring, reviewing, and improving information security controls

Module 7: Practical examples and best practices
