

ISO/IEC 27035 Lead Incident Manager Course

Course Duration: 40 Hrs.

Course Code: ISO27035-LIM

Course Overview

The ISO/IEC 27035 Lead Incident Manager Course is designed to equip participants with advanced knowledge and leadership skills to manage and oversee information security incident management programs in alignment with ISO/IEC 27035. The course focuses on preparing professionals to lead incident response initiatives, coordinate teams, and ensure effective mitigation of security incidents while maintaining compliance with organizational and regulatory requirements. Participants will learn how to implement structured processes to enhance organizational resilience and response capabilities.

What you'll learn?

In this course, you will learn how to plan, implement, and lead comprehensive incident management programs. You will gain skills in detecting, analyzing, responding to, and recovering from security incidents. The training emphasizes leadership in coordinating incident response teams, managing communications with stakeholders, and integrating lessons learned to prevent future incidents.

Target Audience

This course is intended for senior IT professionals, information security managers, incident response leaders, compliance officers, and consultants responsible for managing or overseeing information security incident management programs. It is also suitable for professionals aiming to develop leadership capabilities in incident response and security management.

Pre-Requisites

Participants should have a basic understanding of information security concepts and ISO/IEC 27035 principles. Prior experience in IT, incident response, or security management will be advantageous for fully benefiting from the course content.
