

ISO 18788 Lead Implementer Course

Course Duration: 40 Hrs.

Course Code: ISO18788-LI

Course Overview

The ISO 18788 Lead Implementer Course is designed to equip participants with the knowledge and practical skills required to establish, implement, manage, and maintain a Security Operations Management System (SOMS) in compliance with ISO 18788 requirements. The course focuses on integrating risk management, operational control, and governance principles to ensure responsible, ethical, and effective security operations within organizations.

What you'll learn?

Participants will learn how to interpret ISO 18788 requirements, develop and implement security policies and procedures, conduct risk assessments, and manage operational controls. They will gain expertise in monitoring performance, ensuring continual improvement, and preparing for audits and certification, while embedding ethical and accountable practices in security operations.

Target Audience

This course is intended for security managers, operational leaders, auditors, consultants, compliance officers, and professionals responsible for implementing or managing security operations management systems. It is also suitable for individuals aiming to become certified ISO 18788 Lead Implementers or enhance their expertise in security operations governance.

Pre-Requisites

Participants are recommended to have a basic understanding of security operations, risk management, or management system principles. Prior experience with security management or completion of a foundation-level ISO 18788 course is beneficial but not mandatory.

Course Content

Module 1: Introduction to ISO 18788 and security operations management principles

Module 2: Planning and initiating a Security Operations Management System

Module 3: Risk assessment and management in security operations

Module 4: Designing security policies, procedures, and operational controls
