

# ISO/IEC 27001:2022 Foundation Course

**Course Duration: 16 Hrs.**

**Course Code: ISO27001F**

## Course Overview

The ISO/IEC 27001:2022 Foundation Course provides participants with a comprehensive introduction to the principles, concepts, and requirements of Information Security Management Systems (ISMS) based on the ISO/IEC 27001:2022 standard. The course is designed to build a strong foundation in information security, governance, and compliance, helping learners understand how to protect organizational information assets effectively.

## What you'll learn?

Participants will learn the key elements of ISO/IEC 27001:2022, including its structure, clauses, and controls. They will gain an understanding of the importance of information security, the risk management process, and the benefits of implementing an ISMS. The course also helps participants prepare for further advanced ISO/IEC 27001 certifications.

## Target Audience

This course is intended for beginners in information security, IT professionals, compliance officers, business managers, and anyone interested in understanding the fundamentals of ISO/IEC 27001:2022. It is also suitable for individuals planning to pursue advanced courses such as Lead Implementer or Lead Auditor.

## Pre-Requisites

No prior knowledge or experience with ISO/IEC 27001 is required. However, a basic understanding of information technology or information security concepts can be helpful for easier learning.

## Course Content

**Module 1:** Introduction to ISO/IEC 27001:2022 and ISMS concepts

**Module 2:** Structure, requirements, and clauses of ISO/IEC 27001:2022

**Module 3:** Key principles of information security and risk management

**Module 4:** Overview of Annex A controls and their importance
