

# ISO 28000 Foundation Course

**Course Duration: 40 Hrs.**

**Course Code: ISO28000F**

## Course Overview

The ISO 28000 Foundation Course provides participants with a comprehensive introduction to the principles, concepts, and requirements of a Supply Chain Security Management System (SCSMS) based on ISO 28000. The course is designed to help learners understand the fundamentals of supply chain security, risk management, and the implementation of controls to ensure safe and efficient operations across global supply chains.

## What you'll learn?

Participants will learn the key elements of ISO 28000, including its structure, clauses, and terminology. They will gain an understanding of supply chain security risks, assessment methods, mitigation strategies, and the benefits of implementing a structured SCSMS. The course also prepares participants for advanced certifications such as Lead Implementer or Lead Auditor.

## Target Audience

This course is intended for supply chain managers, logistics professionals, security managers, auditors, consultants, and anyone involved in managing or assessing supply chain security. It is also suitable for individuals preparing to pursue advanced ISO 28000 certifications.

## Pre-Requisites

No prior knowledge of ISO 28000 or supply chain security management is required. A basic understanding of organizational operations or risk management concepts may be helpful but is not mandatory.

## Course Content

**Module 1:** Introduction to ISO 28000 and supply chain security management principles

**Module 2:** Understanding the structure and requirements of ISO 28000

**Module 3:** Supply chain security risk assessment and management

**Module 4:** Implementing security controls and mitigation strategies

**Module 5:** Monitoring, measurement, and continual improvement of SCSMS

**Module 6:** Compliance and regulatory requirements in supply chain security

**Module 7:** Overview of audits and certification processes

**Module 8:** Case studies, best practices, and practical applications of ISO 28000
