

ISO 21502 Lead Project Manager Course

Course Duration: 40 Hrs.

Course Code: ISO21502-LPM

Course Overview

The ISO 21502 Lead Project Manager Course is designed to provide participants with the knowledge, skills, and competencies required to manage projects effectively in alignment with ISO 21502 guidelines. This course emphasizes project management principles, governance, risk management, stakeholder engagement, and performance monitoring, ensuring participants can successfully lead projects across diverse industries and organizational contexts.

What you'll learn?

Participants will learn how to interpret and apply the requirements of ISO 21502, establish a structured project management framework, define project objectives, manage resources, monitor performance, and ensure project delivery within scope, time, and budget. They will gain expertise in governance practices, risk mitigation strategies, and leading project teams to achieve organizational goals.

Target Audience

This course is intended for project managers, program managers, project coordinators, consultants, and professionals involved in planning, implementing, and managing projects. It is also suitable for individuals aspiring to become certified ISO 21502 Lead Project Managers or seeking to enhance their project management capabilities.

Pre-Requisites

Participants are recommended to have a basic understanding of project management concepts and prior involvement in project-related activities. Completing a foundation-level project management course or equivalent professional experience is beneficial but not mandatory.

Course Content

Module 1: Introduction to ISO 21502 and project management principles

Module 2: Project governance, context, and leadership responsibilities
