

ADMCLD – Introduction to SAP Business Technology Platform (BTP) Administration

Course Duration: 24 Hours

Course Code: ADMCLD

1. Course Overview

The **ADMCLD – Introduction to SAP Business Technology Platform (BTP) Administration** course provides learners with a foundational understanding of administrative tasks within SAP BTP. It covers key concepts such as global account structure, subaccounts, entitlements, quotas, and role-based access management. Participants will also learn how to manage services, monitor applications, and configure security settings to ensure efficient and secure BTP operations.

2. What You'll Learn?

- Understand the architecture and components of SAP BTP
- Explore global account and subaccount setup
- Manage entitlements, quotas, and service assignments
- Configure security, users, and role collections
- Monitor applications and troubleshoot issues within SAP BTP
- Understand connectivity and integration options
- Gain hands-on experience in BTP administration tasks

3. Target Audience

- System Administrators and Cloud Administrators
- SAP BTP Administrators and Consultants
- IT Operations and Support Teams
- Project Team Members working on SAP BTP projects
- Anyone starting with SAP BTP administration

4. Pre-Requisites

- Basic understanding of SAP solutions and cloud concepts
- Familiarity with SAP user management (helpful but not mandatory)
- No deep technical background required for beginners
