

SAP Build Process Automation

Course Duration: 24 Hours

Course Code: SAP Build Process Automation

1. Course Overview

The **SAP Build Process Automation** course is designed to provide learners with the knowledge and skills to automate workflows, streamline business processes, and reduce manual efforts using SAP's low-code/no-code capabilities. Participants will gain hands-on experience in building process automations, integrating SAP and non-SAP systems, and applying intelligent technologies such as AI and RPA to optimize business operations.

This training is ideal for professionals aiming to become proficient in SAP's automation tools and deliver enhanced business efficiency.

2. What You'll Learn

- Fundamentals of **SAP Build Process Automation**.
- Creating automated workflows using low-code/no-code tools.
- Integrating SAP applications with external systems.
- Applying robotic process automation (RPA) and AI in processes.
- Managing process lifecycle: design, deployment, and monitoring.
- Enhancing productivity and reducing repetitive manual tasks.

3. Target Audience

- Business process consultants.
- SAP functional and technical consultants.
- Automation specialists.
- IT professionals and project managers.

4. Pre-Requisites

- Basic understanding of **SAP applications** and business processes.
- Knowledge of workflow management concepts.
- Familiarity with cloud platforms is helpful but not mandatory.

5. Course Content (Modules)

Module 1: Introduction to SAP Build Process Automation

Module 2: Low-Code/No-Code Application Development

Module 3: Workflow Design and Automation

Module 4: Robotic Process Automation (RPA) in SAP

Module 5: Integration with SAP S/4HANA and Non-SAP Systems

Module 6: AI and Intelligent Process Automation

Module 7: Monitoring and Managing Automated Workflows

Module 8: Real-World Use Cases and Best Practices
