

Discovering SAP Environment, Health, and Safety Management

Course Duration: 24 Hours

Course Code: EHSM100

1. Course Overview

The **Discovering SAP Environment, Health, and Safety (EH&S) Management** course provides an introduction to SAP EH&S solutions for managing compliance, safety, and environmental regulations. Participants will learn how SAP EH&S helps organizations monitor, manage, and report on workplace safety, chemical compliance, and environmental performance. The course emphasizes best practices, core functionalities, and real-world scenarios to ensure effective EH&S management.

2. What You'll Learn?

- Overview of SAP EH&S modules and architecture
- Managing occupational health and safety processes
- Monitoring environmental compliance and sustainability metrics
- Handling chemical safety and hazardous materials management
- Reporting and analytics for EH&S performance
- Best practices for integrating EH&S with other SAP modules

3. Target Audience

- SAP Functional Consultants
- EH&S Professionals
- Compliance and Safety Officers
- Project Managers and Business Analysts
- IT Professionals supporting SAP EH&S implementations

4. Pre-Requisites

- Basic knowledge of SAP navigation and enterprise processes
- Understanding of environmental, health, or safety compliance concepts is helpful
