

SCOR v2 Course

Course Duration: 40 Hours

Course Code: SCOR-V2

1. Course Overview

The SCOR v2 (Supply Chain Operations Reference) course provides an in-depth understanding of the globally recognized SCOR model developed by APICS. This course equips learners with the knowledge and tools required to design, measure, and optimize supply chain processes effectively. By mastering SCOR v2, participants gain a structured framework to enhance performance, improve efficiency, and align supply chain strategies with business objectives.

2. What You'll Learn?

- Understand the fundamentals and framework of the SCOR v2 model.
- Learn to map supply chain processes using SCOR.
- Analyze performance metrics and KPIs for supply chains.
- Apply SCOR to design, measure, and improve supply chain performance.
- Gain hands-on insights into benchmarking and best practices.
- Use SCOR to align supply chain goals with business strategy.

3. Target Audience

This course is ideal for:

- Supply Chain Managers & Analysts
- Operations and Logistics Professionals

- Business Process Managers
- Consultants & Project Managers
- Professionals aiming for APICS/ASCM certifications
- Anyone involved in supply chain design, execution, or optimization

4. Pre-Requisites

- Basic knowledge of supply chain concepts.
- Familiarity with business processes and operations management.
- No mandatory certification required, but prior exposure to logistics or operations frameworks is beneficial.

5. Course Content

Module 1: Introduction to SCOR v2 Framework

Module 2: Understanding Supply Chain Processes (Plan, Source, Make, Deliver, Return, Enable)

Module 3: Mapping Supply Chain with SCOR

Module 4: SCOR Performance Metrics & KPIs

Module 5: Benchmarking with SCOR v2

Module 6: Best Practices for Supply Chain Improvement

Module 7: Aligning SCOR with Business Strategy

Module 8: Case Studies & Practical Applications
