

Program Management Professional Course

Course Duration: 24 HRS

Course Code: PgMP-CTC

Course Overview

The Program Management Professional (PgMP) Certification Course is designed for experienced program managers who handle multiple, complex projects aligned with organizational goals. This training provides participants with the tools, methodologies, and best practices needed to manage interrelated projects, balance competing demands, and deliver value-driven results. It aligns with PMI's global standards and helps participants prepare thoroughly for the PgMP certification exam.

What you'll learn?

- Gain a deep understanding of PMI's Program Management Standard.
- Learn how to align program strategy with organizational objectives.
- Master stakeholder engagement, communication, and governance techniques.
- Acquire skills for managing program life cycles and resource optimization.
- Build expertise in program performance monitoring and risk management.
- Develop strategies for achieving benefits realization and organizational impact.

- Get comprehensive exam preparation with mock tests and practice scenarios.

Target Audience

- Senior project managers aspiring to advance into program management.
- Program managers seeking global recognition with PMI-PgMP certification.
- Portfolio managers managing multiple programs.
- Executives or directors responsible for strategic initiatives.
- Professionals aiming to strengthen leadership in large-scale project delivery.

Pre-Requisites

- A secondary degree (high school diploma, associate's degree) with 48 months of project management experience or a PMP certification, plus 84 months of program management experience within the last 15 years, OR
- A four-year degree (bachelor's degree or equivalent) with 48 months of project management experience or a PMP certification, plus 48 months of program management experience within the last 15 years.
