

Project Management Professional (PMP®) Course

Course Duration: 40 HRS

Course Code: PMP-CT01

Course Overview

The Project Management Professional (PMP®) Certification Training Course is a globally recognized program designed to prepare professionals for the PMP® certification exam, offered by the Project Management Institute (PMI). This training provides comprehensive knowledge of project management frameworks, methodologies, and best practices aligned with the PMBOK® Guide – 7th Edition. Learners will gain hands-on experience in managing projects across industries, with a strong focus on people, processes, and business environments.

What You'll Learn?

- Master the principles and domains outlined in the PMBOK® Guide.
- Learn to manage projects effectively across scope, time, cost, quality, and risk.
- Apply Agile, hybrid, and predictive project management methodologies.
- Understand stakeholder engagement, leadership, and communication strategies.
- Gain practical tools for scheduling, budgeting, and project execution.
- Build confidence to pass the PMP® certification exam.

Target Audience

- Project Managers seeking PMP® certification.
- Team Leaders, Program Managers, and Delivery Managers.
- IT Managers, Engineers, and Consultants handling projects.

- Professionals aim to advance their careers in project management.
- Business Analysts and Coordinators involved in project environments.

Pre-Requisites

- A four-year degree with 36 months of project management experience, OR
- A secondary degree (high school diploma, associate's degree) with 60 months of project management experience.
- 35 hours of formal project management education/training (fulfilled by this course).
