

# PMI Project Management Ready Course

**Course Duration: 8 HRS**

**Course Code: PMI-PMR-101**

## Course Overview

The PMI Project Management Ready Course is an entry-level certification program that introduces learners to the core principles of project management. It bridges academic learning with real-world project management concepts, equipping students and professionals with foundational knowledge of project management methodologies, tools, and practices. The course provides a solid starting point for anyone looking to pursue a career in project management or enhance their existing skills with PMI-recognized standards.

## What you'll learn?

- Fundamentals of project management concepts and terminology
- Understanding project lifecycles, phases, and processes
- Basics of agile and traditional (waterfall) approaches
- Importance of stakeholder communication and collaboration
- Introduction to business analysis and its role in projects
- Tools and techniques for effective planning, scheduling, and execution

## Target Audience

- Students seeking to build a foundation in project management

- Entry-level professionals exploring a career in project management
- Educators and academic institutions introducing project management concepts
- Professionals from non-project roles looking to add project management skills
- Anyone preparing to pursue higher-level PMI certifications

## Pre-Requisites

- No formal work experience required
- Basic understanding of business concepts (helpful but not mandatory)
- Interest in learning structured project management practices
- Recommended for learners at secondary school, college, or early career stage
