

AI Builder for Power Platform Training

Course Duration: 16 Hours

Course Code: PL-AI-101

1. Course Overview

AI Builder for Power Platform Training helps professionals learn how to integrate artificial intelligence into business applications without deep coding knowledge. This course covers building AI models, automating workflows, and enhancing apps using Microsoft Power Platform tools like Power Apps and Power Automate.

2. What You'll Learn

- Introduction to AI Builder and Power Platform
- Creating and training AI models
- Automating business processes with AI
- Using AI in Power Apps and Power Automate
- Document processing and form recognition
- Prediction models and object detection
- Integrating AI with real-world business scenarios

3. Target Audience

- Business Analysts
- Power Platform Developers
- IT Professionals
- Digital Transformation Teams
- Beginners interested in AI-powered app development

4. Pre-Requisites

- Basic understanding of Microsoft Power Platform
- Familiarity with Power Apps and Power Automate (recommended)
- No prior AI or coding experience required

5. Course Content

Module 1: Introduction to AI Builder

Module 2: Getting Started with Power Platform

Module 3: AI Models Overview

Module 4: Form Processing & Document Automation

Module 5: Prediction Models

Module 6: Object Detection Models

Module 7: AI Integration with Power Apps

Module 8: AI Integration with Power Automate

Module 9: Real-World Use Cases & Projects

Module 10: Deployment & Best Practices
