

# ISO 14001 Introduction Course

**Course Duration: 8 Hrs.**

**Course Code: ISO14001-INT**

## Course Overview

The ISO 14001 Introduction Course provides participants with a basic understanding of the Environmental Management System (EMS) based on ISO 14001. This course introduces the key principles, objectives, and benefits of implementing an EMS, helping organizations enhance environmental performance, ensure regulatory compliance, and promote sustainable practices. It serves as a foundation for professionals looking to build awareness of environmental management standards.

## What you'll learn?

In this course, learners will gain knowledge of ISO 14001 requirements, the structure of an effective Environmental Management System, and the ways it supports organizational sustainability. Participants will understand the role of EMS in improving environmental performance, reducing risks, and aligning business processes with environmental objectives.

## Target Audience

This course is designed for beginners, environmental officers, compliance managers, consultants, and any professional seeking to understand ISO 14001 and its practical benefits for organizations. It is also suitable for employees who are part of an EMS implementation team or wish to develop basic environmental management knowledge.

## Pre-Requisites

There are no formal prerequisites for this course. However, a general

understanding of organizational processes or environmental issues will be beneficial for participants.

## Course Content
