

# ISO 20400 Lead Manager Course

**Course Duration: 40 Hrs.**

**Course Code: ISO20400-LM**

## Course Overview

The ISO 20400 Lead Manager Course is designed to provide participants with an in-depth understanding of sustainable procurement and how it integrates with organizational processes. The course focuses on developing leadership skills required to implement, manage, and improve procurement strategies in alignment with ISO 20400 guidelines. Participants will gain the knowledge and tools necessary to embed sustainability into procurement practices, ensuring value creation for businesses and stakeholders.

## What you'll learn?

In this course, learners will acquire expertise in sustainable procurement principles, risk management, supplier engagement, and the integration of sustainability goals into procurement systems. They will learn how to assess and evaluate sustainability risks and opportunities, apply ISO 20400 guidance in practice, and establish frameworks that align procurement with organizational objectives and global sustainability standards.

## Target Audience

This course is ideal for procurement managers, sustainability officers, supply chain professionals, consultants, auditors, and business leaders who are involved in designing or implementing sustainable procurement frameworks within their organizations.

## Pre-Requisites

There are no strict prerequisites for this course. However, prior knowledge of

procurement, supply chain management, or sustainability practices will be beneficial for better understanding and application of the concepts.
