

# ISO 28000 Introduction Course

**Course Duration: 8 Hrs.**

**Course Code: ISO28000-INT**

## Course Overview

The ISO 28000 Introduction Course provides participants with a basic understanding of the requirements and principles of a Security Management System for the Supply Chain (SMS-SC) based on ISO 28000. The course introduces key concepts, benefits, and the framework for managing supply chain security risks effectively.

## What You'll Learn?

In this course, you will learn the fundamental principles of supply chain security, the structure and clauses of ISO 28000, risk assessment processes, and how organizations can establish basic controls to protect assets, personnel, and information across the supply chain.

## Target Audience

This course is ideal for supply chain managers, security officers, logistics personnel, auditors, compliance officers, and anyone interested in understanding supply chain security management systems.

## Pre-Requisites

There are no formal prerequisites; however, a basic understanding of supply chain operations, risk management, or organizational security practices is helpful..
