

ISO 28000 Lead Implementer Course

Course Duration: 40 Hrs.

Course Code: ISO28000-LI

Course Overview

The ISO 28000 Lead Implementer Course equips participants with the expertise to establish, implement, manage, and continually improve a Supply Chain Security Management System (SMS-SC) in line with ISO 28000 requirements. The course focuses on practical strategies to enhance supply chain security, minimize risks, and ensure compliance with regulatory and organizational standards.

What You'll Learn?

In this course, you will learn how to interpret ISO 28000 requirements, design and implement a robust supply chain security framework, conduct risk assessments, establish controls, monitor performance, and prepare organizations for certification audits.

Target Audience

This course is ideal for supply chain managers, security officers, compliance professionals, consultants, logistics managers, and individuals responsible for implementing or managing supply chain security management systems.

Pre-Requisites

A basic understanding of ISO 28000 or supply chain security concepts is recommended. Prior knowledge of management systems or risk management is advantageous but not mandatory.

Course Content

Module 1: Introduction to ISO 28000 and Supply Chain Security Management Principles

Module 2: Planning and Establishing a Supply Chain Security Management System

Module 3: Implementing ISO 28000 Requirements and Controls

Module 4: Risk Assessment, Monitoring, and Measurement
