

ISO 28000 Transition Course

Course Duration: 16 Hrs.

Course Code: ISO28000-TR

Course Overview

The ISO 28000 Transition Course is designed to help participants update and align their existing Supply Chain Security Management System (SMS-SC) with the latest version of ISO 28000. The course provides guidance on understanding new or revised requirements, implementing necessary changes, and maintaining compliance to ensure continued certification and improved supply chain security.

What You'll Learn?

In this course, you will learn the changes in the latest ISO 28000 standard, how to assess gaps in your current system, update policies and procedures, implement new controls, and maintain an effective supply chain security management system during the transition process.

Target Audience

This course is suitable for supply chain managers, security officers, compliance professionals, auditors, consultants, and anyone responsible for maintaining or updating an existing ISO 28000-based supply chain security management system.

Pre-Requisites

Participants should have prior knowledge of ISO 28000 and experience in implementing or managing a supply chain security management system.

Course Content

Module 1: Introduction to ISO 28000 and Transition Overview

Module 2: Key Changes and Updated Requirements

Module 3: Gap Assessment and Planning for Transition
