

ISO 37000 Corporate Governance Manager Course

Course Duration: 24 Hrs.

Course Code: ISO37000-CGM

Course Overview

The ISO 37000 Corporate Governance Manager Course provides a comprehensive understanding of the principles, practices, and frameworks of good governance as outlined in the ISO 37000 standard. It equips professionals with the skills to manage, implement, and oversee effective governance structures within organizations to ensure transparency, accountability, and sustainable performance. This course bridges the gap between governance theory and practical application, enabling managers to align governance systems with organizational goals.

What you'll learn?

In this course, learners will gain insights into the core principles of corporate governance, how to establish governance frameworks, and methods to assess and improve governance practices. They will also learn to foster organizational integrity, accountability, and stakeholder trust while ensuring alignment with the ISO 37000 guidelines. The course emphasizes leadership roles in governance, governance risk management, and sustainable decision-making.

Target Audience

This course is suitable for governance managers, compliance officers, board members, senior executives, consultants, and professionals involved in designing, implementing, or evaluating corporate governance frameworks in line with international standards.

Pre-Requisites

Participants should have prior knowledge of corporate governance concepts or experience in management, compliance, or organizational leadership.

Familiarity with ISO management system standards will be advantageous.
