

ISO 31000 Introduction Course

Course Duration: 8 Hrs.

Course Code: ISO31000-INT

Course Overview

The ISO 31000 Introduction Course provides a foundational understanding of the principles and guidelines of risk management as defined by the ISO 31000 standard. It is designed to introduce participants to the framework, terminology, and processes required to establish a risk management culture within organizations. This course emphasizes the importance of identifying, assessing, and managing risks effectively to support decision-making and organizational resilience.

What you'll learn?

You will learn the fundamental concepts of risk management, the structure and purpose of the ISO 31000 standard, and how it can be applied to improve governance and performance. The course will help you understand the integration of risk management into organizational strategies and processes while ensuring compliance with international best practices.

Target Audience

This course is intended for managers, consultants, professionals involved in risk assessment and management, compliance officers, auditors, and anyone interested in gaining an overview of ISO 31000 and its practical applications in various industries.

Pre-Requisites

There are no formal prerequisites for this course. However, a basic understanding of organizational processes, management systems, or governance frameworks can be helpful.
